EXECUTIVE SUMMARY

FIRST-TIME HOME BUYERS ON THE RISE IN BUDAPEST

The Hungarian residential property market started the new year with active demand, a brisk turnover and tendencies that lived up to our expectations. Transaction figures and the number of potential buyers are both at a five-year high according to Duna House figures. In January 2021, the demand index closed at a record 102 points and more than 11,000 residential properties found a new owner.

First-time home buyers have always been a resilient, visible segment of the property market and, owing to the state subsidies currently available they are present at constantly increasing numbers. This is supported by our monthly figures that show that their share among buyer has increased by 10 percentage points to 31% compared to January 2020.

This January in Budapest first-time home buyers opted for properties with an average floor space and price of 60 sq. m. and HUF 37.5 million, respectively. In the country, the properties acquired were larger and more affordable at 74 sq. m. and HUF 22.5 million. Employees were the biggest segment of sellers and buyers both in Budapest and in the country.

It is interesting to note that in Western Hungary there was a high demand for properties in need of renovation or in a "habitable" condition with a combined share of 40%.

3 INTERESTING FACTS:

In Buda, 29% of all sales transactions were concluded at sq. m. prices exceeding HUF 900,000. The Duna House Demand Index is at 102 points, indicating a strong demand and an active market.

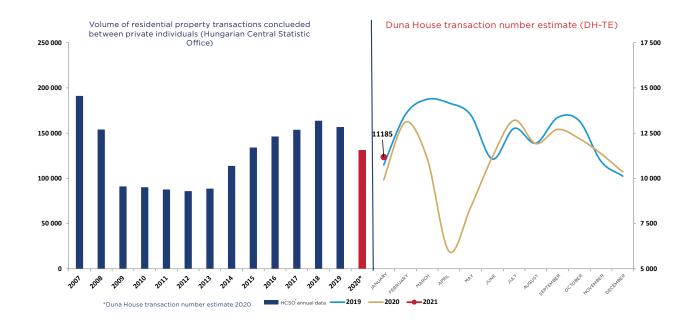

In the capital, average time needed to sell exceeded six months.

TRANSACTION DATA

Duna House Transaction Number Estimate (DH-TE)

Duna House presents its monthly Transaction Number Estimate (DH-TE) and Mortgage Forecast below, showing that in January 2021 11,185 property transactions were concluded and residential mortgage contracts worth HUF 73-75 billion were signed in the whole of Hungary.

| | The below table shows monthly transaction volume estimates by Duna House, prepared in the current month. | | | | | | | | | | | |
|------|--|----------|--------|--------|--------|--------|--------|--------|-----------|---------|----------|----------|
| | JANUARY | FEBRUARY | MARCH | APRIL | MAY | JUNE | JULY | AUGUST | SEPTEMBER | OCTOBER | NOVEMBER | DECEMBER |
| 2019 | 10 741 | 13 532 | 14 373 | 14 166 | 13 512 | 11 069 | 12 764 | 11 945 | 13 364 | 13 182 | 10 945 | 10 127 |
| 2020 | 9 917 | 13 117 | 11 100 | 5 971 | 8 400 | 11 186 | 13 215 | 11 923 | 12 708 | 12 200 | 11 369 | 10 354 |
| 2021 | 11 185 | | | | | | | | | | | |

The Hungarian residential property market started the new year with the strongest January figures of the past five years. The 11,185 transactions estimated by Duna House tells the story of a 13% stronger turnover than in January 2020. The increase in demand had made itself felt in the data recorded by the property agency right in the first weeks of the new year, and part of it resulted in actual sales transactions comparatively quickly, already in January – probably on account of the expectations that had built up at the end of 2020. In view of the government home subsidies introduced recently, Duna House experts continue to expect a brisk residential property market that is well positioned to close the year with 130-150, 000 transactions, slightly more than in the previous year.

As far as the property mortgage market is concerned, Duna House Finances estimates a volume of HUF 73-75 billion, which may be HUF 5 billion less than the figure recorded in January 2020 (HUF 80 billion), but is still a significant increase of 17% compared to the same period of 2019 (HUF 63 billion). The number of inquiries addressed to financial agencies in respect of available government home subsidies also reflects a very active January market. Finances this year's mortgage volume reached HUF 836.2 billion.

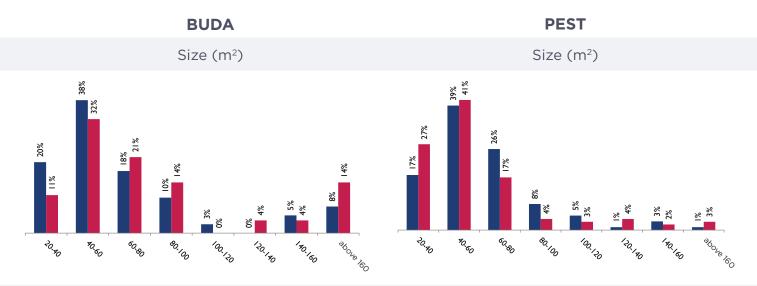

Methodology behind DH-TE: Regardless of the time, the most important indicator of the real estate market is the yearly sale-purchase transaction number. DH-TE is an estimate published by Duna House showing interim approximate data. The estimate is based on monthly transaction number of property brokered by Duna House and the estimated market ratio of Duna House. The estimate of the actual monthly market ratio of Duna House is based on the following indicators:: 1. data published by the Hungarian Central Statistical Office on transactions among private individuals Since the Statistical Office publishes data with a months' delay, the correction of market ratio can be carried out retroactively with refining of the estimate as well. Attention! After 2016 and by the newly built flat boom, pre-contracted transactions are visible in the statistics of the Statistical Office with a delay of several months, even 1-2 years, only following the tariff of the capital transfer tar, resulting in anomalies in the statistics. 2. Amount of issued Energy certificates. 3. Subjective assessment based on other management information from the Duna House Holding.

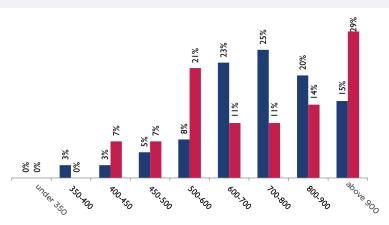

TRANSACTION PARAMETERS IN BUDAPEST

In the past year the popularity of apartments with a floor space of less than 60 sq. m. decreased, the share of transactions in this size category fell from 58% to 43%. At the same time, the share of homes larger than 160 sq. m. grew by 6 percentage points and were responsible for 14% of all transactions in Buda. In Pest, buyers were after smaller properties than at the same time last year: 68% of all transactions involved homes smaller than 60 sq. m.

In Buda, 29% of transactions were concluded at sq. m. prices exceeding HUF 900,000 and the share of this category grew by 14 percentage points compared to the same period last year. There was a similar increase for properties in the HUF 500,000-600,000 per sq. m. price range. In Pest, the market was markedly more balanced, still properties between HUF 25-30 million overshadowed all other categories as their share grew from 17% to 32%. There was a similar increase on the Buda bank of the Danube: demand for properties worth more than HUF 70 million grew by 14 percentage points compared to January 2020. At the same time the share of properties in the sub-25 million HUF category shrank from 18% in 2020 to 8% this year.

TRANSACTION PARAMETERS REGIONALLY

In the country, this January 70% of buyers opted for properties between 40-100 sq. m. 41% of homes in the country changed their owners at prices below HUF 250,000 per sq. m. Demand for the HUF 10-15 million category decreased by 6 percentage points compared to the same period of 2020.

In County Pest, the popularity of properties sold in the HUF 250,000 or less category saw a sharp decrease: their share was a mere 16% compared to 35% last year. The popularity of homes in the HUF 350,000-600,000 category grew, these made up 59% of all sales transactions. As far as prices are concerned, homes worth more than HUF 40 million are still the most popular: their share grew by a further 12 percentage points compared to January 2020.

PRICES - RESIDENTIAL FLAT DATA

The average sq. m. price of concrete block apartments sold in January grew by 4% and 11% in the Eastern and Western parts of the country, respectively. As far as brick and mortar apartments are concerned, the sq. m. prices stagnated in the East and grew by 19% in the West.

The average sq. m. price of concrete block homes sold in January decreased by 10% in Buda and grew by 8% in Pest compared to the same period of last year. The sales price of pre-owned brick and mortar apartments stagnated in Pest and in Downtown Budapest and grew by 8% in Buda compared to January 2020. The strength of buyers' position in the whole of Budapest is reflected in the fact that properties sold at prices 10%-13% lower than the initial asking price.

Based on purchase prices of the given period of properties brokered by Duna House.

Methodology: Change in the listing price is the difference between the first price indicated by the seller in the Duna House assignment and the last registered price at the time of the appearance of the buyer. Bargain shows additional changes in the price agreed upon by the seller and buyer. The two indicators together give a good picture of the difference in price between the original idea of the seller and the actual final price

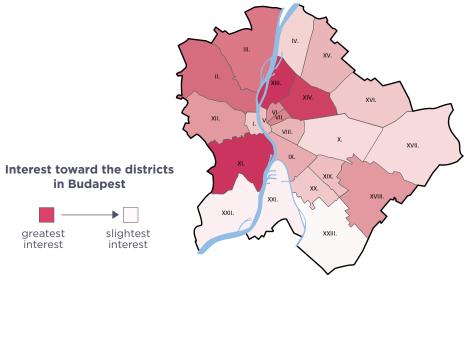

BUYERS - DEMAND INDEX

The Duna House Demand Index is currently at 102 points, significantly higher than in the previous month. This indicates a continued strong demand and a keen property market activity in the entire country.

INTEREST TOWARD THE DISTRICTS

The winner of the popularity contest in Budapest districts was District 13, followed by Districts 11 and 14. The districts of Downtown Budapest all lost some of their popularity compared to the same period of last year.

same time) when meeting with our agents. The above preference map is put together based on

QUALITY PREFERENCE

The majority of buyers still prefer properties in a "good" or "very good" condition with a share between 60%-79% in January. Demand for properties in need of renovation or just "habitable" was high in Western Hungary, the combined share of these segments reached 40%.

TIME NEED OF SALE

Turnover tendency still tells a tale of a slowing market which means the average time needed to sell a property got longer in all regions of the country. In January sellers needed to wait at least 106 days for a successful sales transaction while in the same period last year properties sold in 2-2.5 months maximum. Concrete block apartments sold a little faster, within 3.5-5 months, while selling their brick and mortar counterparts took 4–6.5 months on average.

BUYER'S PROFILE BUDAPEST

This January the percentage of buyers between 20-30 and 30-40 years of age grew with a combined share of 52% of all buyers. 48% and 18% of buyers in Budapest were employees and self-employed, respectively. The percentages a year ago were just the opposite. The share of purchase transactions motivated by investment goals fell to 38% from 49% in January 2020. This category was followed by first-time home buyers with a share of 31%.

BUYER'S PROFILE ON REGIONAL LEVEL

In the country, the age distribution of buyers was similar to that recorded in January 2020. Similarly to the capital, the majority of buyers were employees in the country, too, with a share of 58%. The main motivation to buy was moving into a larger home (29%), closely followed by those buying as an investment and those acquiring their first home.

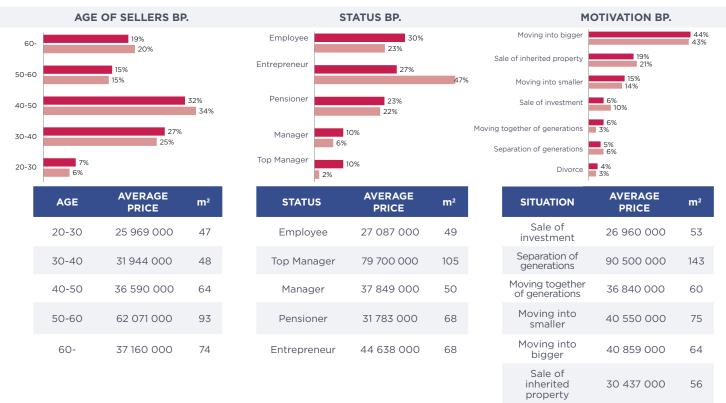

Based on the methodology, investment purpose acquisitions include every property transaction, which is regarded as investment by the buyer, i.e. it is not a strictly business approach qualification. Thus, the category includes family investments, or short time investments targeting properties for renovation, sold following the renovation. The latter case has a positive effect on the preservation of property, being a rather useful activity in the present building industry and property market environment Data presented above relating age, status and reason of purchase have been acquired through the voluntary declaration of our clients. They qualify as sampling and are regarded as estimated values

SELLER'S PROFILE BUDAPEST

As usual, the age distribution of sellers is a mixed bag. This January 59% of sellers in Budapest were between 30-50 years of age. In contrast to January 2020 the biggest seller group were not self-employed but employees. The share of top managers also grew significantly from 2% to 10%. They were selling their homes with an average size of 105 sq. m. and cashed HUF 79.7 million on average. The main motivation to sell was still moving into a larger property with a share of 44% of all sales transactions.

SELLER'S PROFILE ON REGIONAL LEVEL

Seller profile in the country was similar to that seen a year ago. The majority of sellers were employees here, too. The main motivation to sell with a share of 30% was moving into a larger home followed by selling an inherited property and moving into a smaller home.

PERSONALIZED AND CUSTOMIZED REAL ESTATE MARKET STUDIES FROM DUNA HOUSE'S RESEARCH DEPARTMENT

DECISION SUPPORTIVE BUSINESS ANALYSIS FOR ALL.

Duna House research department's experienced team offers the preparation of personalized and customized market studies, reports, as well as answers to project specific needs.

The greatest advantage of Duna House studies is the provision of the most up-to-date information to our clients, based on our own database of a wide scale and inputs both on the demand and supply side of the market.

Duna House's database is the largest collection of up-to-date real sale and purchase data in the country, containing information in addition to prices about demand, bargain potential, quality preferences and client profiles. Our analytical portfolio also includes the latest mortgage data for the support of a comprehensive research.

WHO IS IT INTENDED FOR?

Our analytical studies can support all those who believe in the power of data and facts, and who wish to make their business decisions based on them.

We recommend our studies to:

- Constructors and developers
- ✓ Project owners and investors
- Community managers
- ✓ Municipalities

REQUEST AN OFFER AND GET THE MOST OUT OF DUNA HOUSE MARKET DATA!
